Spring 2026

Term Project

Building a MIPS Black Board Game

User Manual

By - Sanskriti Tiwari

Professor - Mrs. Alice Wang

Date - 3 April 2026

My device specifications

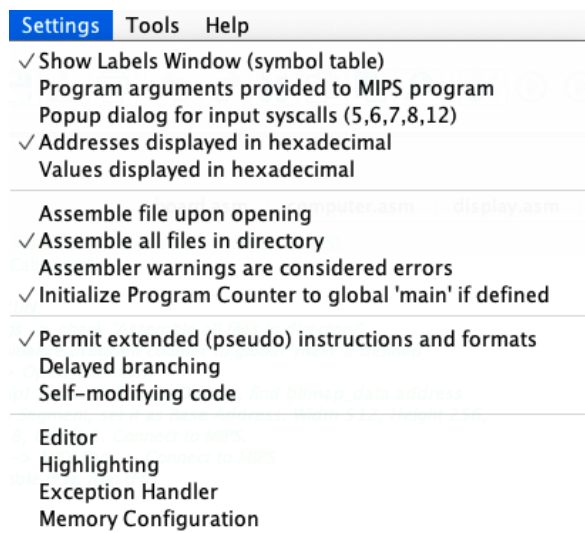

Procedures

- Download the zip folder and move it to your desktop for easy access.
- Double click the zip folder to access the files
- Open the MARS app installed on your desktop.

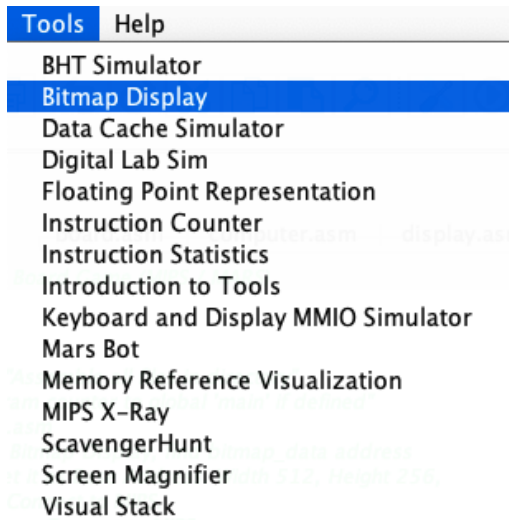

- In the edit section of MARS drag and drop all the files.
- Before assembling the code, be sure to enable the following settings:

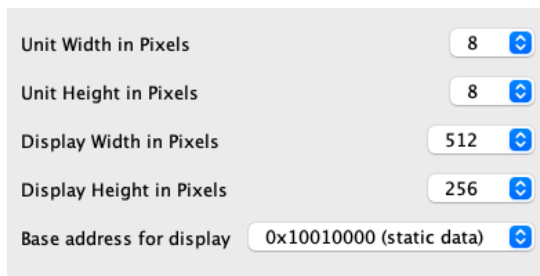

- Assemble the main.asm file by clicking on the following icon

- When successfully assembled with no errors, open the Bitmap Display from the Tools section as given in the picture:

- Modify the Bitmap settings as given in the picture:

- Click the “Connect from MIPS” button on the bottom left of the Bitmap Display.
- Once connected run the program by clicking on the icon .
- When done playing the black hole board game, the program automatically terminates.
- Click on the “Disconnect from MIPS” button on the bottom left of the Bitmap Display and close the window.
- Close the application.

Note: Not disconnecting the MIPS properly could freeze the application. Force quit the MARS app and follow the procedure all over again.
